### Required Tools:

- color Printer
- strong paper (A4) or thin cardboard  
optimal 160 - 200 gr/m<sup>2</sup>
- optional: shoebox-cardboard or similar
- paper fastener (round head)
- small paper scissors, optional nail scissors
- paper glue

### Installation instructions:

- print this PDF in color
- cut out the two templates
- cut out the optional cardboard to stabilize the charging display inside (approx 107x145 mm)
- cut out time opening
- attach the time disc in the center with the fastener
- fold the charging disc, insert the optional cardboard and glue at borders. The time disc must be inside the adhesive edge and be able to rotate.
- If not already completed **note down your mobile number in the contact field.**

### Use:

- Adjust the charging disc to show the scheduled departure time. By doing so you can help others in possible emergencies.
